This document, *A Physician’s Guide to Occupational Health and Safety Responsibilities* has been developed through consultation with the College of Physicians and Surgeons of Alberta (CPSA) and the Alberta Government – Employment and Immigration (E&I), Workplace Innovation and Continuous Improvement: Work Safe Alberta. We acknowledge the valuable contributions of the people who participated on the working group.

It is also available on the website at: www.worksafely.org or by link from the CPSA website at: http://www.cpsa.ab.ca/home/home.asp
Key Messages

This document, *A Physician’s Guide to Occupational Health and Safety Responsibilities*, has been developed to assist physicians and their staff, as employers and as workers, to understand and maintain compliance with the *Alberta Occupational Health and Safety (OHS) Act, Regulation and Code* to ensure the health and safety of themselves, their co-workers and their employees. The focus is on the prevention of work-related illnesses and injuries of workers.

In Alberta workers are protected by the Occupational Health and Safety (OHS) Legislation

Employers are responsible for ensuring the health and safety of all workers at their work site.

Workers are responsible for ensuring the health and safety of themselves and other workers while conducting their work at the work site.

**Employers must:**
- identify workplace hazards and conduct a written hazard assessment
- eliminate or control the identified hazards
- inform workers of existing or potential hazards and methods of control

**Employers must ensure that workers:**
- are competent to work in a safe and healthy manner
- are trained in operation of equipment and tools
- are trained in procedures for working with harmful substances
- are trained in use of PPE

**Workers must:**
- take part in and apply training
- not perform work they are not competent to perform

**Employers must:**
- report serious incidents and fatalities to the Government of Alberta (GOA) workplace health and safety
- investigate incidents that cause injury or have the potential to cause a serious injury.
Employers must:
• consider workplace violence when conducting their hazard assessment and implement appropriate controls to protect workers

SECTION 8:
PREVENTING WORKPLACE VIOLENCE

Employers must:
• have a written emergency response plan that includes all the elements outlined in the OHS Code Part 7
• communicate this plan to all workers

SECTION 7:
EMERGENCY RESPONSE

Employers must:
• provide first aid services, supplies and equipment that meet the requirements outlined in the OHS Code, Part 11.
• maintain first aid records for 3 years

SECTION 6:
FIRST AID

Employers must:
• ensure workers who are working alone have a means of communication to obtain assistance if required

SECTION 9:
WORKING ALONE

Physicians in Alberta have specific obligations under the Occupational Health and Safety legislation to:
• report notifiable diseases to the Government of Alberta, Workplace Health and Safety, Director of Medical Services
• furnish reports on workers who have work-related illnesses or injuries when requested by the the Government of Alberta, Workplace Health and Safety, Director of Medical Services

SECTION 10:
PHYSICIAN OBLIGATIONS REGARDING PATIENT/CLIENT WORKERS UNDER THE OHS LEGISLATION
SECTION 1

INTRODUCTION
About this Document

This document, A Physician’s Guide to Occupational Health and Safety Responsibilities, has been developed to assist physicians and their staff, as employers and as workers, to understand and maintain compliance with the Alberta Occupational Health and Safety (OHS) Act, Regulation and Code to ensure the health and safety of themselves, their co-workers and their employees. The focus is on the prevention of work-related illnesses and injuries of workers.

The document has been developed for use by all physicians in Alberta in all work settings such as, but not limited to:

Physicians in community practice including:
- Private offices
- Medical clinics
- After hours and walk-in clinics

College accredited diagnostic and treatment facilities:
- Non-hospital surgical
- Diagnostic imaging
- Medical laboratories
- Pulmonary function laboratories
- Clinical neurophysiology
- Cardiac exercise stress testing

Physicians as workers and directors of work in all work settings such as:
- Acute care hospitals
- Long term care facilities
- Primary care networks
- Other institutions

This document is meant to be read in its entirety to provide information on the legislated roles and responsibilities for workplace health and safety in Alberta. The laws for health and safety are minimum requirements. Some best practices¹, tools, forms and a list of resources are provided to assist physicians in meeting or exceeding the minimum requirements.

For clarity, the legislated requirements (laws) are specifically identified in yellow highlighted text boxes.

Not all requirements under the OHS Act, Regulations and Code are discussed in this resource. This is not a definitive guide to the legislation and does not exempt readers from their responsibilities under applicable legislation. In case of inconsistency between this resource and the occupational health and safety legislation or any other legislation, the legislation will always prevail.

1. See definition under Glossary of Terms
For more detailed information, refer to the *OHS Act, Regulation or Code*, and to the employers’ safe work procedures. Employers’ safe work practices and site-specific requirements may exceed the minimum requirements of the OHS Legislation.

**Copyright and Terms of Use**

This material, including copyright and marks under the Trade Marks Act (Canada) is owned by the Government of Alberta and protected by law.

This material may be used, reproduced, stored or transmitted for non-commercial purpose. However, Crown copyright is to be acknowledged. If it to be used, reproduced, stored or transmitted for commercial purposes written consent of the Minister is necessary.

**Disclaimer**

Information in this document is provided solely for the user’s information and is provided strictly on an “as is” basis and without any warranty of any kind. The Crown, its agents, employees or contractors will not be liable for any damages, direct or indirect, or lost profits arising out of use of information provided in this document or for information provided at any of the resource sites listed in this document.
SECTION 2
WHAT ARE THE LAWS FOR OCCUPATIONAL HEALTH AND SAFETY?
In Alberta workers are protected by the Occupational Health and Safety Legislation. Employers are responsible for ensuring the health and safety of all workers at their work site. Workers are responsible for ensuring the health and safety of themselves and other workers while conducting their work at the work site.

Alberta’s Occupational Health and Safety (OHS) Legislation are laws that help protect the health and safety of workers at work.

Alberta’s OHS legislation has three (3) parts:
1. Occupational Health and Safety (OHS) Act
2. Occupational Health and Safety (OHS) Regulation

**The OHS Act:**

- Sets minimum standards to protect and promote the health and safety of workers throughout Alberta.
- Defines the obligations of employers and workers.
- Establishes the authority and powers of government officials to enforce the law.
- Specifies maximum penalties
- Establishes broad rules of procedure in the case of a workplace incident.
- Creates the authority of the Regulation and Code.

**The OHS Regulation:**

- Establishes broad provisions (rules) that apply to all Alberta workplaces. These provisions reflect government policies and are the minimum requirement to ensure the protection of Alberta workers.
- Contains specified administrative processes.

**The OHS Code:**

- Contains detailed technical requirements for creating safe and healthy workplaces. In some cases, the provisions specify an “objective” requirement—which allows the use of options. In other cases, the provisions specify precisely what is required—these provisions must be met in order to remain in compliance.
- Contains references to recognized technical Standards (such as Canadian Standards Association – CSA).
Where Do I Find the Legislation?

Explanation guides to assist in interpretation of the legislation are available at: http://employment.alberta.ca/cps/rde/xchg/hre/hs.xsl/3969.html

Official printed copies may be purchased from the Queen’s Printer at: http://www.qp.gov.ab.ca/documents/acts/O02.cfm

or:

Edmonton Bookstore
Main Floor, Park Plaza
10611- 98 Avenue
Edmonton, Alberta
T5K 2P7
Phone: (780) 427-4952
Fax: (780) 452-0668

Who is covered under the Alberta OHS Legislation?

The *OHS Act, Regulation and Code* affect most workers and employers in Alberta including the healthcare industry and physicians.

The major exceptions are:
- Farmers and ranchers
- Domestic workers (such as nannies, housekeepers) and persons working at home
- Workers in federally regulated industries (for example, banks, transportation companies crossing provincial borders, television and radio broadcasters)

Reference: *OHS Act*, Section 1(5)

General Obligations of Employers

Who is an employer?

Under the Alberta *Occupational Health and Safety Act*:

An employer means:
- A person who is self-employed in an occupation
- A person who employs one or more workers
- A person designated by an employer as the employer’s representative, or
- A director or officer of a corporation who oversees the occupational health and safety of the worker employed by the corporation

Reference: *OHS Act*, Section 2 (1)
Application to Physicians

Physicians must consider their occupational health and safety responsibilities as both employers—where they are the actual employer of staff (i.e. their private practice office or clinic) and as workers. For example, physicians who work in a hospital setting where they are not specifically the employer of workers, have responsibilities as workers to ensure the health and safety of themselves and other workers while engaged in their occupation.

Employer Responsibilities

Under the *OHS Act*, Section 2 (1), employers are responsible for ensuring the health and safety of all workers at the work site. Specific requirements are outlined throughout the *OHS Act, Regulation and Code* depending on the work that is to be done.

Responsibilities include but are not limited to:

- Identifying hazards, conducting a written hazard assessment and implementing controls
- Informing workers of any hazards on the job site
- Ensuring that workers are aware of their responsibilities and duties under the *OHS Act*
- Ensuring that all equipment used at a worksite is properly maintained and safe for use
- Ensuring that workers completing work are either competent to do so, or under the direct supervision of a worker who is competent
- Ensuring that workers are adequately trained in the safe operation of equipment, including safety equipment
- Ensuring that workers are adequately trained in the use of safe operating procedures, including any procedures designed to minimize the workers exposure to a harmful substance
- Properly labelling, storage and disposal of dangerous chemicals
- Ensuring workers perform their duties as required by the OHS Legislation
- Monitoring workers who may be exposed to certain hazards such as chemicals or noise, in some cases specific health examinations may be required
- Establishing policies and procedures dealing with storing, handling, using and disposal of biohazardous materials

Reference: *OHS Regulation, Sections 12, 13, 15; OHS Code, Part 35*
For information on the meaning of “due diligence” and “reasonably practicable” please refer to the Workplace Health and Safety Due Diligence bulletin available at: http://employment.alberta.ca/documents/WHS/WHS-PUB_li015.pdf

Worker Responsibilities

Workers have responsibilities under the OHS legislation as well. These are outlined throughout the OHS Act, Regulation and Code and include, but are not limited to the following:

Workers must:

• take reasonable care to protect the health and safety of themselves and other workers while performing their duties
• not perform work they are not competent to do unless they are under the supervision of a competent worker
• immediately report to their employer any equipment that is unsafe or not functioning properly
• follow health and safety work procedures developed by their employer
• participate in and apply training provided by the employer regarding safe operations of equipment or harmful substances they may be exposed to
• wear personal protective equipment required by their employer
• refuse to do work that may put them or another worker in “imminent danger”

Reference: OHS Act, Sections 2(2), 35. OHS Regulation Sections 14, 15

Other Specific Requirements

Imminent Danger

Section 35 of the OHS Act outlines both the employers and workers responsibilities in regard to the workers responsibility to refuse work where there exists an imminent danger.
LEGISLATED REQUIREMENTS

On being notified of refusal to work under imminent danger, the employer shall:

- investigate and take action to eliminate the imminent danger
- ensure that no worker is assigned to use or operate the tool, appliance or equipment or perform the work for which a worker has made notification of refusal to work unless
  - the worker to be assigned is not exposed to imminent danger or
  - the imminent danger has been eliminated
- prepare a written record of the worker's notification, the investigation and action taken
- give the worker who gave the notification a copy of the record

Reference: OHS Regulation, Sections 12, 13, 15; OHS Code, Part 35

Example

An example of an imminent danger situation would be a healthcare worker being asked to continue carrying out work in a facility with a known gas leak resulting in a methane concentration of more than 1% (20% of the lower explosive limit). As the healthcare worker is not competent or properly equipped to handle fire and explosion emergencies, the worker must refuse to carry out any work and notify the employer immediately.
For further information on how to find information in the *OHS Act, Regulation and Code* access the Workplace Health and Safety eLearning program on the legislation at:
http://employment.alberta.ca/whs/learning/Legislation/Legislation.htm

Publications and bulletins are available on a variety of health and safety topics at:
www.worksafely.org

**Role of the Government of Alberta**

**Occupational Health and Safety (OHS) Officers**

Occupational Health and Safety Officers are employees of the Government of Alberta. The role of the Occupational Health and Safety Officer is to ensure that employers meet minimum legislated standards to provide healthy and safe worksites as outlined in the *OHS Act, Regulation and Code*. Officers may conduct inspections of worksites. Officers also investigate serious incidents and worker fatalities.

Officers may enter any work site at any reasonable hour, interview persons at the work site, require the production of records, or take samples or photographs at the work site.

Officers may write orders, stop work or stop the use of equipment if there are unsafe or unhealthy conditions at that site. For more details on the roles of Officers refer to the *OHS Act*, Section 9.

To file a complaint or report a serious incident call the Workplace Health & Safety (WHS) Contact Centre toll-free at 1-866-415-8690, 24 hours a day, seven days a week or go to the website at:
http://employment.alberta.ca/cps/rde/xchg/hre/hsl/hs.xsl/2874.html
Resources for OHS Legislation:

- e-learning program on the Legislation at: http://employment.alberta.ca/whs/learning/Legislation/Legislation.htm
- **OHS Act**: http://www.qp.gov.ab.ca/documents/acts/O02.cfm
SECTION 3
IDENTIFYING AND CONTROLLING HAZARDS
Legislated Requirements

Hazard identification, assessment, and control is at the foundation of occupational health and safety, and is a requirement under the Alberta Occupational Health and Safety Code.

Employer responsibilities

Before work begins at a new work site:

Employers must:

• Assess a work site and identify existing and potential hazards
• Prepare a written and dated hazard assessment, including the methods used to control or eliminate the hazards identified.
• Where possible, involve workers in the hazard assessment
• Make sure workers are informed of the hazards and the methods used to control the hazards

Reference: OHS Code, Part 2

Hazard assessment is not a one time thing. The laws require that:

An employer must make sure that a hazard assessment is done:

• At reasonably practicable intervals to prevent the development of unsafe and unhealthy working conditions
• When a new work process is introduced
• When a work process or operation changes
• Before the construction of a new work site

Reference: OHS Code, Part 2

Identifying and Assessing Hazards

What is a Hazard?

A hazard is any situation, condition or thing that may be dangerous to the safety or health of workers.

Reference: OHS Code, Part 2
Hazards may be grouped into four main categories:

<table>
<thead>
<tr>
<th>Physical Hazards</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Lifting and handling loads e.g. manual materials handling</td>
</tr>
<tr>
<td>• Repetitive motions</td>
</tr>
<tr>
<td>• Slipping and tripping hazards e.g. poorly maintained floors</td>
</tr>
<tr>
<td>• Equipment</td>
</tr>
<tr>
<td>• Fire</td>
</tr>
<tr>
<td>• Electricity e.g. poor wiring, frayed cords</td>
</tr>
<tr>
<td>• Excess noise</td>
</tr>
<tr>
<td>• Inadequate lighting</td>
</tr>
<tr>
<td>• Extreme temperatures</td>
</tr>
<tr>
<td>• Vibration</td>
</tr>
<tr>
<td>• Ionizing radiation</td>
</tr>
<tr>
<td>• Workplace violence</td>
</tr>
<tr>
<td>• Lasers</td>
</tr>
<tr>
<td>• Saws</td>
</tr>
<tr>
<td>• Cautery equipment</td>
</tr>
<tr>
<td>• Sharps</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Chemical Hazards</th>

<td>• Shift work</td>
</tr>
<tr>
<td>• Working alone</td>
</tr>
<tr>
<td>• Workplace violence</td>
</tr>
<tr>
<td>• Working with chronically ill and dying patients (stress)</td>
</tr>
</tbody>
</table>
How to Conduct a Hazard Assessment...

There are a number of ways to find hazards in the workplace including:

- Walk around and look at your workplace and at how work is done.
  Ask your workers what they consider unsafe.
- Think about what could possibly go wrong and don't overlook the things that people may have 'worked around' for years. Ask yourself “what if....?”
- Review any information you may have on a particular piece of equipment (manufacturer’s specifications) or chemical (Material Safety Data Sheets (MSDS)) to see what it says about work practices, conditions of use and safety precautions.

Questions to Ask When Looking for Hazards

- What is your working environment ie: office, clinic, laboratory?
- How suitable are the things you use for the task? Are they easily accessible?
- How might people be hurt directly by equipment, machinery and tools?
- How might people be hurt indirectly through noise, fumes, radiation etc?
- How might people be hurt by using chemicals and/or other materials (solvents, cleaning agents, lasers, gases, biological samples, wastes)?
- Are workers using equipment and materials correctly?
- Are workers at risk of exposure to violence?

For further information on Hazard Assessment and Control access our eLearning Program at:
http://employment.alberta.ca/whs/learning/hazard/Hazard.htm

Eliminating and Controlling Hazards

The employer is responsible for identifying, eliminating or controlling all hazards at their work sites.

Whenever possible, hazards should be eliminated. If this is not possible they must be controlled. Control means reducing the hazard to levels that do not present a risk to worker health. The preferred hierarchy of controls is outlined in the OHS Code, Part 2, Section 9. Controls, in order of preference are:
### Engineering controls (Preferred method)
- First try to eliminate the hazard completely. This could mean removing trip hazards on the floor or disposing of unwanted chemicals, outdated equipment etc.
- If it is not practical to eliminate the hazard completely, try to substitute it with something safer, such as using a less toxic chemical, ordering supplies in smaller packages for easier lifting etc.
- Isolate the hazard: for example, use sound proof barriers to reduce noise levels, shield from radiation; use remote control systems to operate equipment.
- Use mechanical lifts to move heavy loads.
- Ventilation – ensure general ventilation air exchanges are appropriate to work activity and local exhaust ventilation is in place where needed.

### Administrative controls
- Use safe work procedures.
- Provide training and supervision for workers.
- Ensure regular maintenance of machinery and equipment.
- Limit exposure times by using job rotation.
- Staff immunization programs.

### Personal Protective Equipment (PPE)
- Includes gloves, hearing and eye protection, protective clothing, respirators, proper footwear, face shields etc.
- Ensure that
  - The right type of PPE is selected for the job.
  - PPE fits properly and is comfortable under working conditions.
  - Workers are trained in the need for PPE, its use, proper donning and doffing, limitations and maintenance.
  - PPE is stored in a clean and fully operational condition.
  - Workers are fit tested for use of respiratory protective equipment (RPE) where it is required based on the hazard assessment.

### Combination of the above
- Engineering
- Administrative
- PPE
Worker Responsibilities

Workers must use the equipment provided for lifting, lowering, pushing, pulling, carrying, handling, or transporting heavy or awkward loads

Reference: OHS Code, Part 14: Lifting and Handling Loads

Legislation Applicable to Chemical Hazards, Biological Hazards and Harmful Substances

Legislation related to chemical and biological hazards and harmful substances is found in several sections of the OHS legislation. Part 4 of the OHS Code outlines some specific requirements related to worker exposures and monitoring.

Harmful substance means a substance that, because of its properties, application, or presence, creates or could create a danger, including a chemical or biological hazard, to the health and safety of a worker exposed to it.

Reference: OHS Code, Part 1, H

Schedule 1, Table 2 of the OHS Code lists the Occupational Exposure Limits (OEL’s) for chemical substances in Alberta. Employers must be in compliance with these exposure limits for the chemicals used at their work sites.
Legislation Applicable to Biological Hazards

Legislation related to biological hazards may be found in several sections of the OHS legislation, including, but not limited to, Part 4 and Part 35 of the OHS Code.

OHS Code, Part 35: Health Care and Industries with Biological Hazards

Employer Responsibilities

**Sharps containers**
An employer must:
- provide sharps containers and ensure that they are located as close as reasonably practicable to where sharps are used
- ensure that a sharps container has a clearly defined fill line and is sturdy enough to resist puncture under normal conditions of use and handling

**Policies and procedures**
An employer must:
- establish policies and procedures dealing with storing, handling, using and disposing of biohazardous material
- ensure that workers are informed of the health hazards associated with exposure to the biohazardous material
- ensure that worker exposure to biohazardous materials is kept as low as reasonably practicable

**Limited exposure**
- An employer must ensure that worker exposure to biohazardous materials is kept as low as reasonably practicable

**Post-exposure management**
- An employer must establish policies and procedures for the post-exposure management of workers exposed to biohazardous material

Reference: OHS Code, Part 35: Health Care and Industries with Biological Hazards

Worker Responsibilities

**Sharps containers**
- A worker must use the sharps container provided

**Recapping needles**
- A person must not recap waste needles

Reference: OHS Code, Part 35
Best Practices for Safe Handling and Disposal of Sharps

As a best practice, individuals working with sharps should consider the following:

- It is the personal responsibility of the person using the sharp to dispose of it immediately and safely.
- Sharps should not be passed directly from hand to hand, and handling should be kept to a minimum.
- Needles and syringes should be disposed of in one piece.
- Always dispose of sharps at the point of use in a suitable container.
- Do not fill sharps containers more than two-thirds full or above the manufacturer’s marked line.

References:

- http://www.mhb.ie/mhb/OurServices/PoliciesProceduresGuidelines/Appendix1/CentralServices/InfectionControl/d7691.PDF
Legislation Applicable to Radiation Safety

In Alberta the *Radiation Protection Act* and *Radiation Protection Regulation* provide the legislative framework for a comprehensive system to protect workers and the public from overexposure to radiation. Employer and worker responsibilities are similar to those found in the *OHS Act and Regulation*. If there is a conflict between the *Radiation Protection Act* and the *OHS Act*, the *OHS Act* prevails.

**The Radiation Protection Act**

- Specifies that certain radiation equipment designated in the *Radiation Protection Regulation* require registration certificates prior to use
- Requires owners of radiation equipment to investigate radiation incidents or overexposures and take corrective actions
- Requires owners to establish and implement a quality assurance program and a regular preventive maintenance program for their diagnostic x-ray equipment
- Authorizes radiation health officers to conduct inspections of radiation facilities or radiation equipment
- Authorizes the Minister to issue written directives prohibiting the use of a radiation facility or radiation equipment until it is in compliance with the Act and Regulation

**The Radiation Protection Regulation**

- Specifies maximum exposure limits for ionizing and non-ionizing (laser, radiofrequency electromagnetic fields) radiation
- Requires employers to ensure that radiation workers are provided with and use a dosimeter to monitor their personal exposure to ionizing radiation
- Specifies that diagnostic or therapeutic x-ray equipment, cabinet x-ray equipment and Class 3B or 4 lasers require a registration certificate prior to use
- Requires owners of radiation equipment to ensure that shielding is adequate to ensure that the maximum exposure limits for ionizing radiation are not exceeded
- Requires that the installation and use of medical diagnostic x-ray equipment must comply with Health Canada’s Safety Code 20A “X-ray Equipment in Medical Diagnosis Part A: Recommended Safety Procedures for Installation and Use”
- Requires that the installation and use of lasers in a health care facility must comply with Canadian Standards Association’s Z386-08 “Laser Safety in Health Care Facilities”

Information on the registration of designated radiation equipment in private and public medical facilities (including public dental facilities and podiatry facilities), and access to Safety Code 20A, is available on the College of Physicians and Surgeons of Alberta website at:
http://www.cpsa.ab.ca/facilitiesaccreditation/radiation_equipment.asp

For the use, storage, disposal or transportation of radiation sources produced by the nuclear fuel cycle i.e. those used in nuclear medicine the Nuclear Safety and Control Act (Canada) applies. This Act and its associated Regulations are available at:
http://www.nuclearsafety.gc.ca/eng/resource/regulations

The Radiation Protection Act and Regulation do not apply to the installation and use of diagnostic ultrasound equipment. However, Health Canada has published Guidelines for the Safe Use of Diagnostic Ultrasound available at:

Guidelines for the safe use of ultrasound physical therapy equipment can also be found on Health Canada’s website at:

SECTION 4
WORKER COMPETENCY AND TRAINING
Legislation Specifically Applicable to Health Care Settings

Legislation related to lifting and handling may be found in several sections of the OHS legislation. Part 14 of the OHS Code provides some specific requirements:

Employer Responsibilities

**Equipment**

A heavy or awkward load includes equipment, goods, supplies, persons, and animals

**An employer must:**

- provide, where reasonably practicable, appropriate equipment for lifting, lowering, pushing, pulling, carrying, handling or transporting heavy or awkward loads
- ensure that workers use the equipment provided

**Adapting heavy or awkward loads**

If the equipment provided is not reasonably practicable in a particular circumstance or for a particular heavy or awkward load, the employer must take all practicable means

- to adapt the load to facilitate lifting, lowering, pushing, pulling, carrying, handling or transporting the load without injuring workers
- or to otherwise minimize the manual handling required to move the load

**Assessing manual handling hazards**

Before a worker manually lifts, lowers, pushes, pulls, carries, handles or transports a load that could injure the worker, an employer must perform a hazard assessment that considers

- the weight of the load
- the size of the load
- the shape of the load
- the number of times the load will be moved
- the manner in which the load will be moved

**Musculoskeletal injuries**

If a worker reports to the employer what the worker believes to be work related symptoms of a musculoskeletal injury, the employer must promptly

- review the activities of that worker, and of other workers doing similar tasks, to identify work-related causes of symptoms, if any
- take corrective actions to avoid further injuries if the causes of the symptoms are work related

Reference: OHS Code, Part 14: Lifting and Handling Loads
Legislated Requirements

General requirements for worker training are included throughout the OHS Legislation. These include, but are not limited to the following:

**Employer responsibilities**

If a worker may be exposed to a harmful substance at a work site, the employer must:
• establish procedures that minimize the worker’s exposure to the harmful substance
• ensure that a worker who may be exposed to the harmful substance is trained in the procedures, applies the training, and is informed of the health hazards associated with exposure to the harmful substance

Employers must ensure that a worker is trained in the safe operation of the equipment the worker is required to operate.

Reference: OHS Regulation, Section 15

If the hazard assessment indicates the need for personal protective equipment (PPE) an employer must ensure that workers are trained in the correct use, care, limitations and maintenance of the PPE

Reference: OHS Code, Part 28, 228(l)

**Competent Worker**

If work is to be done that may endanger a worker, the employer must ensure that the work is done
• by a worker who is competent to do the work or
• by a worker who is working under the direct supervision of a worker who is competent to do the work

Reference: OHS Code, Part 28, 228(l)

1. See definition under Glossary of Terms
**What is a competent worker?**

“...adequately qualified, suitably trained, and with sufficient experience to safely perform work without supervision or with only a minimal degree of supervision”

Reference: OHS Regulation, Section 1

---

**Worker Responsibilities**

- A worker who is not competent to perform work that may endanger the worker or others must not perform the work except under the direct supervision of a worker who is competent to perform the work.
- A worker must immediately report to the employer equipment that:
  - is in a condition that will compromise the health or safety of workers using or transporting it
  - will not perform the function for which it is intended or was designed
  - is not strong enough for its purpose, or
  - has an obvious defect

Reference: OHS Regulation, Section 14

Workers must:
- participate in the training provided by an employer
- apply the training

Reference: OHS Regulation, Section 15

---

Specific requirements for worker training are identified throughout the OHS legislation. Refer to these for job specific requirements.
Resources for Worker Competency and Training:

- Appendix E: Sample Worker Orientation Record
- Appendix F: Sample Record of Training
- Best Practices for Cleaning, Disinfection & Sterilization, Provincial Infectious Diseases Advisory Committee (PIDAC), Ministry of Health and Long-Term Care/Public Health Division/Provincial Infectious Diseases: http://www.health.gov.on.ca/english/providers/program/infectious/diseases/best_prac/bp CDs_2.pdf
- Flash Sterilization in Health Care Settings, Provincial Infectious Diseases Advisory Committee (PIDAC) Ontario Hospitals Association: http://www.health.gov.on.ca/english/providers/program/infectious/pidac/fact_sheet/fs flash_sterile_20080117.pdf
SECTION 5 REPORTING AND INVESTIGATING INCIDENTS AND/OR INJURIES
Legislated Requirements

Under Section 18 of the *OHS Act*, if a serious injury or accident occurs at a work site or if any other serious injury or other accident that has the potential of causing serious injury to a person occurs at the work site, the employer shall:

- Report it to Government of Alberta Workplace Health and Safety
- Carry out an investigation into the circumstances surrounding the serious injury or accident
- Prepare a report outlining the circumstances of the serious injury or accident and the corrective actions, if any, undertaken to prevent the recurrence of the serious injury or accident and
- Ensure that a copy of the report is readily available for inspection by an officer
- Retain the report for 2 years

Reference: *OHS Act*, Section 18

To report incidents or concerns call the Workplace Health and Safety (WHS) Contact Centre at:

Edmonton and surrounding area: 780 415-8690
Throughout Alberta: 1-866-415-8690
or go to www.worksafely.org

Also refer to the e-learning program on the investigation of incidents at:
http://employment.alberta.ca/whs/learning/Incident/Incident.htm

Two of the events that employers must report to Government of Alberta Workplace Health and Safety that may be seen in a healthcare setting include:

- An injury or accident that results in death
- An injury or accident that results in a worker being admitted to a hospital for more than 2 days

Reference: *OHS Act*, Section 18 (see *OHS Act* for complete list)
Note: There are also separate requirements for reporting injuries to the Worker’s Compensation Board (WCB). These are covered under the Worker’s Compensation Act, which is different from the Occupational Health and Safety legislation. For more information and access to WCB publications and forms, go to: www.wcb.ab.ca

**Promptly Investigate All Incidents and Near-Misses**

Employers should investigate all incidents and near-misses.

Near-misses are incidents that cause no visible injury or damage but that could have caused serious injuries or property damage under slightly different circumstances. They should be investigated because they point to conditions or work practices that must be changed to prevent future incidents.

Everyone at the workplace has a role to play in an incident investigation. Workers must report incidents to their supervisors. The owner, employer, or supervisor should promptly start investigations of incidents. If possible, one employer representative and one worker representative should participate in the investigation. After the investigation is complete, an investigation report must be prepared.

For more information on incident investigation visit the Workplace Health & Safety eLearning program on Incident Investigation at: http://employment.alberta.ca/whs/learning/Incident/Incident.htm

**Resources for Reporting and Investigating Incidents and Injuries:**

- Appendix G: Sample Incident Investigation form
- eLearning program on Incident Investigation at: http://employment.alberta.ca/whs/learning/Incident/Incident.htm
SECTION 6
FIRST AID
Legislated Requirements

First aid means
“The immediate and temporary care given to an injured or ill person at a work site using available equipment, supplies, facilities, or services, including treatment to sustain life, to prevent a condition from becoming worse or to promote recovery”

Reference: OHS Code, Part 1

In Alberta, workplace First Aid requirements are outlined in Part 11 of the Occupational Health and Safety (OHS) Code. Specific requirements are listed in Schedule 2 of the OHS Code and are determined based on:
• How hazardous the work is
• The time taken to travel from the work site to a health care facility (hospital)
• The number of workers on each shift

Employer Responsibilities

Employers are responsible for:
• Providing first aid services, supplies and equipment in accordance with Schedule 2 of the Code
• Ensuring that the services, supplies and equipment are located near the work site they serve and are maintained, available and accessible during all working hours
• Communicating the information about first aid to workers
• Ensuring arrangements are in place to transport injured or ill workers from the work site to the nearest health care facility
• Ensuring that first aiders are trained
• Ensuring that injuries and acute illnesses are reported to the employer and recorded, and that records are kept confidential
• Maintain first aid records for 3 years.

For more detailed requirements refer to Part 11 and Schedule 2 of the OHS Code.

Acceptances

Under the OHS Code, Part 11, Section 178(1), an acceptance may be granted by the Director of Medical Services for services that provide equal to or better worker protection than those outlined in the legislation.
Director of Medical Services means a physician appointed by the Minister for the administration of the Occupational Health and Safety legislation.

RESOURCES

Resources for First Aid:

• Appendix H: Sample First Aid Record Form
• Publication on First Aid Records at: http://employment.alberta.ca/documents/WHS/WHS-PUB_fa009.pdf
An emergency may be defined as “any situation or occurrence of a serious nature, developing suddenly and unexpectedly, and demanding immediate attention”.

In Alberta, the OHS Code, Part 7 requires employers to establish an emergency response plan for response to an emergency that may require rescue or evacuation.

Also reference the emergency response plan for your region for more information.

**Legislated Requirements**

- Employers must establish an emergency response plan in case of an emergency that may require rescue or evacuation. The plan must be written, and affected workers must be consulted in the development of the plan.
- The emergency response plan must include:
  - The identification of potential emergencies (based on the hazard assessment)
  - Procedures for dealing with the identified emergencies
  - The identification of, location of and operational procedures for emergency equipment
  - The emergency response training requirements
  - The location and use of emergency facilities
  - The fire protection requirements
  - The alarm and emergency communication requirements
  - The first aid services required
  - Procedures for rescue and evacuation
  - The designated rescue and evacuation workers

Reference: OHS Code, Part 7

**Resources for Emergency Response Planning:**

- Appendix J: Sample Emergency Response Plan form

---

2. See definition under Glossary of Terms
SECTION 8
PREVENTING WORKPLACE VIOLENCE
The potential for violence in the workplace is increasingly recognized as a hazard at healthcare workplaces in Alberta. Under the OHS Code, Part 27, employers are required to consider workplace violence when conducting their hazard assessment. Identifying situations where workers may be exposed to violence assists the employer in the implementation of controls such as policies and procedures to decrease the possibility of their workers being exposed to violence.

**Legislated Requirements**

**Employer Responsibilities**

Employers must:

- Ensure that workplace violence is considered as a hazard.
- Develop a policy and procedures for potential workplace violence
- Ensure workers are instructed in the recognition, reporting and response to workplace violence

Reference: OHS Code, Part 27

**Categories of Workplace Violence**

Violence in the workplace may fall into one of the following categories:

- Stranger violence (such as a robbery/drug seekers)
- Client/customer violence
- Co-worker violence
- Violence related to domestic issues
Factors to consider when assessing the risk of workplace violence

Does the work involve any of the following?

- Working alone or in small numbers
- Working between 11 pm and 6 am
- Providing emergency interventions
- Working with patients in a healthcare setting
- Working with unstable or violent individuals
- Working at or near a site targeted by protestors or action groups
- Working with or having controlled substances on-site
- Working in proximity to businesses that experience an elevated risk such as:
  - retail, especially with money, prescription drugs, jewellery
  - where alcohol is sold or consumed
  - law enforcement, correction, security or any other inspection
    or regulatory occupation
- Working in or near areas of increased crime
- Working in isolated or remote areas
- Working with persons where domestic violence is a concern
- Visiting clients/patients in their homes

Resources for Preventing Workplace Violence:

- Appendix I: Sample Workplace Violence Prevention Policy and Procedures
- Alberta WCB: Preventing Workplace Violence: www.wcb.ab.ca/workingsafely/violence.asp
- Staff Abuse: Prevention and Management (This one may also be appropriate for Hazards Assessment and Control): http://www.hbas.ca/sapm/index.html
SECTION 9
WORKING ALONE
A worker is “working alone” if they are at a work site and assistance is not readily available in case of emergency, injury, or illness.

**Legislated Requirements**

**Employer Responsibilities**

Employers must ensure that an effective communication system is in place between a worker who works alone and persons who can provide assistance in case of an emergency, illness, or injury. This may include one or more of the following methods:

- Radio, telephone, or other electronic communication
- Visiting or contacting the worker at intervals appropriate to the nature of hazards of the work

Reference: OHS Code, Part 28

**Resources related to Working Alone:**

SECTION 10

PHYSICIAN OBLIGATIONS REGARDING PATIENT/CLIENT WORKERS UNDER THE ALBERTA OCCUPATIONAL HEALTH AND SAFETY LEGISLATION
Physicians in Alberta have specific obligations under the Occupational Health and Safety legislation to:
- report notifiable diseases to the Government of Alberta, Workplace Health and Safety, Director of Medical Services
- furnish reports on workers who have work-related illnesses or injuries when requested by the Government of Alberta, Workplace Health and Safety, Director of Medical Services

In addition to their responsibilities for health and safety as employers and as workers, physicians have specific obligations under Alberta Occupational Health and Safety legislation related to workers who they see as clients/patients. Basic information on these obligations are provided in this section.

Obligation to Report Notifiable Occupational Diseases

Physicians are required to report notifiable occupational diseases to the Alberta Government, Workplace Health and Safety, Director of Medical Services.¹

Legislated requirements

When a physician, in the course of the physician’s practice as a physician, finds that a person examined by the physician is affected with or is suffering from a notifiable disease, the physician shall, within 7 days after the diagnosis of that disease, notify a Director of Medical Services in writing of the name, address and place of employment of that person and the name of the notifiable disease.

Reference: OHS Code, Part 22

¹ The Director of Medical Services means a physician appointed by the Minister for the administration of the Occupational Health and Safety legislation. Reference OHS Act Sections 1 (h), 5. The Director of Medical Services is an occupational health physician who is a member of the staff of the Government of Alberta, Workplace Health and Safety.
What is a notifiable disease

A notifiable disease means a disease or a state of ill health designated in the *OHS Regulation* as a notifiable disease.

Reference: *OHS Code*, Part 22

The following are notifiable diseases for the purpose of Section 22 of the *OHS Act*:
- asbestosis
- mesothelioma
- asbestos-induced lung cancer
- asbestos-induced laryngeal cancer
- asbestos-induced gastrointestinal cancer
- coal worker’s pneumoconiosis
- silicosis
- lead poisoning
- noise-induced hearing loss

Reference: *OHS Regulation*, Section 6

For more detailed information and to access the notifiable disease sample reporting form go to the WHS Publication: *Notifiable Occupational Diseases – Information for Physicians* at: [http://employment.alberta.ca/documents/WHS/WHS-PUB_mg030.pdf](http://employment.alberta.ca/documents/WHS/WHS-PUB_mg030.pdf)

Health Assessments, Medical Monitoring and Reporting Requirements

Health assessments for workers exposed to asbestos, silica, or coal dust

Section 24 of the *OHS Act* outlines that workers who are employed in a hazardous occupation or at a hazardous work site may be required to have regular medical examinations. The specific requirements for these examinations are outlined in Part 4, Section 40 of the *OHS Code*. 
Legislated Requirements

Requirements for workers who may be exposed to asbestos, silica or coal dust include:

- A health assessment of the worker must include the following:
  - The identity of the worker and the employer
  - The date of the medical examination, chest x-ray and spirogram
  - A 35 centimetres by 43 centimetres postero-anterior view chest x-ray, including a radiologist’s report
  - A spirogram, conducted by a pulmonary function technician, including determinants of force expiratory volume in the first second and forced vital capacity
  - A history covering
    - occupational exposures to asbestos, silica, coal dust, or other industrial dusts and carcinogens
    - significant exposures to asbestos, silica, coal dust, other dust and carcinogens during non work-related activities
    - significant symptoms that may indicate silicosis, pneumoconiosis, asbestosis or cancer.
    - past and current medical diagnosis of respiratory disease and
    - the worker’s smoking history
  - A written interpretation and explanation of the results by a physician of the health assessment to the worker not more than 60 days after the tests are completed

The physician must give the written interpretation and explanation of the results of the health assessment to the worker not more than 60 days after the tests are completed.

The physician must ensure that the records of the health assessment are kept for not less than 30 years.

The person with custody of the health assessment record must ensure that no person, other than the worker or health professional who conducts the health assessment, the staff supervised by the health professional or another person authorized by law to have access, has access to the exposed worker’s health assessment unless:

- the record is in a form that does not identify the worker, or
- the worker gives written permission for access by another person.

Reference: OHS Code, Part 4, Section 40
Medical monitoring for lead

Legislated Requirements

Under the *OHS Code*, Part 4, Section 43, employers have responsibilities to ensure workers exposed to lead at a work site have access to blood lead testing.

Employer Responsibilities

- An employer must ensure that blood lead testing is available to a worker if the worker at a work site could reasonably be expected to have an elevated body burden of lead.
- An employer must ensure that a worker exposed to lead is informed of the availability of the blood lead test.
- The employer must pay the cost of a blood lead test.
- An exposed worker may refuse to undergo a blood level test by giving the employer a written statement refusing it.
- An employer must not coerce, threaten or force a worker into refusing part or all of the test.

Reference: *OHS Code*, part 4, Section 43

Physician Responsibilities

Physicians have a responsibility under Section 22 of the *OHS Act* to report elevated blood lead results to the Director of Medical Services, as outlined under Notifiable Disease Reporting. A worker with a blood lead level greater than 2.5 umol/L or symptoms diagnosed as a result of a lead exposure, is considered to have lead poisoning. The Director or Medical Services must be notified if a worker has a blood lead level of 2.5 umol/L or greater.²

---

Medical Reports

A physician who performs or supervises a medical examination of a worker as required under the OHS legislation shall, on the request of a Director of Medical Services, furnish any medical reports that a Director may require.

A physician, nurse or first aid attendant who attends a worker who became ill or was injured while engaged in an occupation shall, on the request of a Director of Medical Services, furnish any reports that a Director may require.

Reference: OHS Act, Section 23

NOTE: There are separate reporting requirements for the Worker’s Compensation Board (WCB). For information on WCB reporting go to their website at: http://www.wcb.ab.ca/home/

Resources for Physician Obligations related to patient/client workers

- Release of Medical Information: A Guide for Alberta Physicians, College of Physicians and Surgeons of Alberta (CPSA)
Appendix A: Glossary of Terms

Acute Illness or Injury – A physical injury or sudden occurrence of an illness that results in the need for immediate care.

Alberta Employment and Immigration (AEI) – The government ministry responsible for the Occupational Health and Safety Act, Regulation and Code. Its job is to work with employers and workers to ensure legislation is followed as much as possible to prevent workplace incidents, injuries and illnesses, and to ensure employers and workers are educated in their occupational health and safety duties.

Best Practice – For the purpose of this document, a best practice in health and safety is defined as a program, process, strategy or activity that: has been shown to be effective in the prevention of workplace injury or illness; has been implemented, maintained and evaluated; is based on current information; and is of value to, or transferable to, other organizations. Best practices are living documents and must be reviewed and modified on a regular basis to assess their validity, accuracy and applicability. They may and often do exceed the requirements of OHS legislation.

Competent Worker – An adequately qualified, suitably trained person with sufficient experience to safely perform work without supervision.

Director of Medical Services – a physician appointed by the Minister for the administration of the Occupational Health and Safety legislation. Reference OHS Act Sections 1 (h), 5. The Director of Medical Services is an occupational health physician who is a member of the staff of the Government of Alberta, Workplace Health and Safety.

Due Diligence – The level of judgment, care, prudence, determination and activity that a person would reasonably be expected to do under particular circumstances.

Emergency – Any situation or occurrence of a serious nature, developing suddenly and unexpectedly, and demanding immediate attention.

Employer – You are an employer if: you employ one or more workers; you are designated to represent an employer; your responsibility is to oversee workers’ health and safety; or you are self-employed.

Equipment – A thing used to equip workers at a worksite; includes tools, supplies, machinery and sanitary facilities.

First Aid – The immediate and temporary care given to an injured or suddenly ill person at a worksite using available equipment, supplies, facilities or services. First aid has three objectives: preserve life; prevent the injury or illness from becoming worse; promote recovery.

First Aider (emergency, standard or advanced) – A competent individual designated by an employer to provide first aid to workers at a worksite.

Hazard – Any situation, condition or thing that may be dangerous to the safety or health of workers. There are four standard hazard categories: physical hazards; chemical hazards; biological hazards; and psychological hazards.
Hazard Assessment – Careful evaluation of all equipment, machinery, work areas and processes to identify potential sources of hazards that workers may be exposed to.

Hazard Control – Control measures implemented to eliminate or reduce the risk of harm to workers.

Imminent Danger – Any danger that isn’t normal for a job, or any dangerous conditions under which a worker wouldn’t normally carry out their work. If workers think their work may put them or another worker in imminent danger, they must refuse to do it. Reference OHS Act.

Incident – An undesired event that results in physical harm to a person or damage to property, including near misses.

Joint Health and Safety Committee – A group of worker and employer representatives working together to identify and solve health and safety problems at the workplace. In Alberta, the establishment of a committee is voluntary, except for those workplaces required by Ministerial Order to have a committee.

Near Miss – An incident that did not cause visible injury or property damage but that could have resulted in serious injury, personal harm, death or property damage.

OHS Act – The Occupational Health and Safety Act sets out legislative framework to ensure workplace conditions are safe and do not pose a danger of injury or illness. A general duty clause serves as a blanket statement that employers are accountable for the health and safety of workers.

OHS Code – The Occupational Health and Safety Code sets out specific health and safety rules for work-related operations and practices within Alberta’s various industries to ensure that workplace conditions are safe and do not pose a danger of injury or illness.

OHS Regulation – The Occupational Health and Safety Regulation sets out requirements for specific workplace conditions and work practices that must be met in order for a workplace to be considered in compliance with OHS legislation.

Partnerships in Health and Safety – A voluntary Alberta program of Workplace Health and Safety based on the concept that when employers and workers build effective Health and Safety Management Systems the human and financial costs of workplace injuries and illnesses will be reduced.

Personal Protective Equipment (PPE) – Equipment or apparel that when worn lessens the potential harmful effects of a known hazard (i.e. gloves, hard hats, steel-toed footwear, etc.)

Reasonably Practicable – A legally defined term that is assessed using the reasonable person test.

Reasonable Person Test – The assessment of what a dozen peers would consider reasonable in a similar set of circumstances, resulting in a balanced and wise judgment that could be defended to others.
Safe Work Practice – A written set of guidelines that establishes a standard of performance for an activity.

Safe Work Procedure – A written, step-by-step description of how to perform a task from beginning to end.

Standards – Standards are produced by voluntary organizations, such as the Canadian Standards Association (CSA), American National Standards Institute (ANSI) and the International Organization for Standardization (ISO). Standards do not have the power of law. However, if they are adopted by legislation, they become part of the law and are enforceable. For example, if the OHS Code states that workers must wear footwear approved to a particular CSA standard, then the CSA standard has the power of law.

WHMIS (Workplace Hazardous Materials Information System) – A comprehensive plan for providing information on the safe use of hazardous materials in Canadian workplaces. The information is provided by means of: product labels; Material Safety Data Sheets (MSDS); and worker education programs.

Worker – A person engaged in an occupation, including managers, supervisors and volunteers.

Workplace Health and Safety (WHS) – A division/department of Alberta Employment and Immigration.

Note

The following documents are meant to be used as a foundation in developing your company’s own forms and procedures. As no two workplaces are the same, it will be necessary to customize these forms and procedures to your own specific situation. The department makes no warranty as the applicability, completeness, or effectiveness of any these documents in developing your specific health and safety programs. It is strongly advised to use your own qualified safety professional(s) and/or legal advisor to develop processes that meet or exceed the minimum legislative requirements.

Appendix J: Sample Workplace Violence Policy and Procedures

The management of Company Name recognizes the potential for workplace violence and other aggressive behavior directed at our employees. We will not tolerate behavior from anyone that intimidates, threatens, harasses, abuses, injures or otherwise victimizes our employees and will take whatever steps are appropriate to protect our employees from the potential hazards associated with workplace violence. We are committed to providing our employees with an appropriate level of protection from the hazards associated with workplace violence.

Management Responsibilities

Management will:

• Inform employees if they are working in an area where there is a potential for violence and identify any risks that are specific to that area.
• Ensure that appropriate procedures are in place to minimize the risk to our employees from violence.
• Ensure that employees are trained in recognizing and responding to situations involving workplace violence.
• Ensure that every reported incident of workplace violence is investigated and potential areas for improvement are identified.

Employee Responsibilities

• Employees of Company Name are required to be familiar with and follow the procedures that are in place to protect them from workplace violence.
• All employees must participate in the instruction of workplace violence prevention.
• Employees are required to immediately report all incidents of workplace violence to their supervisor or (identify alternate) e.g. manager, foreman, security.
• Employees are also responsible for participating in work site hazard assessments and implementing controls and procedures to eliminate or control the associated hazards.

No employee can be penalized, reprimanded or in any way criticized when acting in good faith while following the procedures for addressing situations involving workplace violence.

Signature of company owner/president

Date
Procedures

In addition to a policy, procedures should be developed and communicated to all workers. The procedures should address the following areas:

- How potential hazards will be identified and communicated to staff
- How to respond to workplace violence
- How to report workplace violence
- How to investigate and document incidents of workplace violence
- The support available for victims of workplace violence
- Training of workers
## Feedback Form

Alberta Employment and Immigration (AEI) would like your feedback on the *Occupational Health and Safety Guide for Physician’s Offices.*

Please send the completed form to:
Sharon L. Chadwick, Senior Manager
WHS Program Planning, Research and Audit
Workplace Innovation and Continuous Improvement
8th Floor, 10808-99 Avenue
Edmonton, Alberta T5K 0G5
or Fax to: 1-780-422-0014

Date survey completed ________________________________

The following questions will help us determine the usefulness of the *content* available in the guide. Please choose **one** answer.
